

Personalis, Inc. to Present at European NeoAG Summit 2019

April 23, 2019

Menlo Park, CA – April 23, 2019 – Personalis, Inc., a leader in advanced genomics for cancer, today announced that the company will present at European NeoAG Summit 2019 in Amsterdam on April 24th at 2:30 PM CEST.

The [presentation](#), entitled “Immunoid NeXT Platform: Improving Neoantigen Prediction, TME Assessment, and ctDNA Detection for Vaccine Development,” will introduce Personalis’ new universal cancer immunogenomics platform, Immunoid NeXT™. In addition to an overview, the presentation will highlight innovative genomics methods for more comprehensive assessment of neoantigens, which include improving neoantigen-to-MHC binding prediction and ranking and assessing TME/TCR and tumor escape mechanisms that may impact vaccine response.

[Immunoid NeXT](#) is the first platform to provide comprehensive analysis of both a tumor and its immune microenvironment from a single sample. The platform can be used to investigate the key tumor- and immune-related areas of cancer biology, consolidating multiple oncology biomarker assays into one. This maximizes the biological information that can be generated from a precious tumor specimen.

The presentation will be delivered by Sean M. Boyle, Ph.D., Director, Bioinformatics Applications for Personalis.

About Personalis, Inc.

Personalis, Inc. is a growing cancer genomics company transforming the development of next-generation therapies by providing more comprehensive molecular data about each patient’s cancer and immune response. The company’s NeXT Platform is designed to adapt to the complex and evolving understanding of cancer, providing its biopharmaceutical customers with information on all of the approximately 20,000 human genes, together with the immune system, from a single sample. The Personalis [Clinical Laboratory](#) is GxP-aligned as well as CLIA ‘88-certified and CAP-accredited.
