

Personalis, Inc. to Present at the 2019 Immuno-Oncology 360 Conference in New York

February 5, 2019

Menlo Park, CA – February 5, 2019 – Personalis, Inc., a leader in advanced genomics for precision oncology, today announced that they are scheduled to present at the upcoming Immuno-Oncology 360[®] Conference in New York on Thursday, February 7, 2019 at 3:50 PM, EST.

The [presentation](#), entitled “A Universal Cancer Immunogenomics Solution for Biomarker Discovery,” will discuss the current challenges facing investigators in immuno-oncology translational research and explore how the Personalis Platform overcomes the limitations associated with conventional NGS approaches that are used in translational research and the clinical development of new oncology therapeutics. The presentation will also introduce Personalis’ new ImmunoID NeXT Platform™.

[ImmunoID NeXT](#) is the first and only platform to provide comprehensive analysis of both a tumor and its microenvironment from a single sample. The platform can be used to investigate the key tumor- and immune-related areas of cancer biology; consolidating multiple oncology biomarker assays into one. This maximizes the biological information that can be generated from a precious tumor specimen.

The presentation will be delivered by Kedar Hastak, PhD, Field Applications Scientist for Personalis.

About Personalis, Inc.

Personalis, Inc. is a leader in advanced genomics for precision oncology translational research and clinical trials, dedicated to enabling the development of the next generation of oncology therapeutics. The company’s ImmunoID NeXT Platform comprehensively characterizes the tumor and the tumor microenvironment, facilitating the analysis of key predictive and investigational oncology biomarkers from a single sample. The Personalis [Clinical Laboratory](#) is GxP aligned as well as CLIA88-certified and CAP-accredited.
