

Personalis, Inc. to Present at Advances in Immuno-Oncology Congress USA 2019

MENLO PARK, Calif. – October 8, 2019 – Personalis, Inc. (Nasdaq: PSNL), a leader in advanced genomics for cancer, today announced that the company will present at Advances in Immuno-Oncology Congress USA 2019 in San Diego on October 8th at 2:50 PM PDT.

The presentation, titled “Advancing Precision Oncology Biomarker Discovery with a Multidimensional Immunogenomics Platform,” will describe the Personalis universal cancer immunogenomics platform, ImmunoID NeXT™. In addition to an overview, the presentation will cover preliminary data from an ongoing study in which this platform is being used to evaluate IO-related biomarkers and potential tumor escape mechanisms in a cohort of melanoma patients treated with anti-PD-1 therapy.

ImmunoID NeXT™ is the first platform to enable comprehensive analysis of both a tumor and its immune microenvironment from a single sample. The platform can be used to investigate the key tumor- and immune-related areas of cancer biology, consolidating multiple oncology biomarker assays into one. This maximizes the biological information that can be generated from a precious tumor specimen.

The presentation will be delivered by Kedar Hastak, Ph.D., Field Application Scientist.

About Personalis, Inc.

Personalis, Inc. is a growing cancer genomics company transforming the development of next-generation therapies by providing more comprehensive molecular data about each patient’s cancer and immune response. The company’s NeXT™ Platform is designed to adapt to the complex and evolving understanding of cancer, providing its biopharmaceutical customers with information on all of the approximately 20,000 human genes, together with the immune system, from a single tissue sample. Personalis also provides genomic information to the VA Million Veterans Program as part of their goal to sequence over a million veteran genomes. The Personalis Clinical Laboratory is GxP aligned as well as CLIA’88-certified and CAP-accredited.
